

Please replace the paragraph beginning at page 39, line ¹¹~~13~~, with the following rewritten paragraph:

A₂ Though not explained above in detail, a circuit for servo error may be fabricated as described in, for example, Japanese patent laid open Publication 7-320282/1995. A circuit for detection of prepit information may be fabricated as described in, for example, Japanese patent laid open Publication 10-283638/1998. Further, a circuit for wobble signal may be fabricated as described in, for example, Japanese patent laid open Publication 2000-113454. With reference to these publications here, they are incorporated in the specification.
